Dear fellow members,

As we all are aware that **COVID-19** is leading to mass economic destruction for poor communities due to the closure of business activities across the country, there is a **huge demand for food, grocery, and precautionary material (masks & sanitizers, etc)**.

Secondly, due to the inaccessibility of hospitals, there is an **urgent need for blood. There are about two lack (200,000) thalassemia patients - especially kids in different centers across the country** and a requirement of hundreds of blood bottles on daily basis.

To cater to the above demand, **Petroleum Club has decided to participate in this CSR activity.**

You can do this by joining hands with us and by supporting and donating to your preferred NGOs or by individual help and support to the ones who are in need within your close circle.

Besides, you can also reach us to collect donations or assist you, since we are trying to work with different NGOs. If you opt for the latter, please don't forget to send us the transaction advice or info to enable us for issuing you the computerized receipt. Also please mention either it is donation, zakat or sadaqa.

On behalf of

**Petroleum Club Of Pakistan**
