

HALLIBURTON

Petroleum Club of Pakistan (PCP) with the collaboration with Landmark Halliburton is launching a weekly webinar series for students and industry professional focusing on advancement and new technology in Petroleum Industry.

These webinars will be delivered through Microsoft Teams platform and should be accessible over your company or home network. Each session will consist of a presentation and demo (around 40 minutes) followed by Q&A discussions. Please feel free to share the invitation with your colleagues as well.

Our second webinar topic will be “**Velocity Modelling**” which will be delivered by Tadeo Ditta.

Tadeo Ditta is Geoscience Technical Advisor for Middle East and North Africa Region, Joining Halliburton since 2014. Tadeo started his career at 2013, as Reservoir Technical Specialist for Roxar RMS in Indonesia. Then in 2014, He moved to Halliburton as a Technical Consultant for Asia Pacific region and had been put in roles as an advisor for major oil companies in Asia, such as PTTEP, Chevron, Petronas, PVEP, PERTAMINA to help and advice for design and implementing geoscience workflows and solutions. He moves to Middle East Region in 2018, and responsible for providing technical consultancy on Halliburton’s Geoscience Application Technologies.

Velocity Modelling

Agenda for the Webinar

- What are challenges in Depth Imaging
- Why interpreters should pay more attention in velocity model building
- How to build a proper velocity model
- How to deal with uncertainty in velocity modeling
- Practical Demonstration

At the end of the webinar certificates will be also available for the participants from Halliburton and PCP

Monday, 22nd June 2020, 02:00 PM – 03:00 PM (Pakistan Standard Time)

Please click on “Join Microsoft Teams Meeting’s” link to join the webinar. Feel free to contact us if you face any difficulty accessing the below link.
